

Very™

Product Sheet

Very International.
Introducing a Seating Family with Universal Appeal.

Haworth introduces the Very family of seating. Designed by the Haworth Design Studio and Simon Desanta, Very seating brings global design and adaptability to the forefront.

Very delivers international design with a smart, slender profile that celebrates its light scale and airy aesthetic. With its attractive angles and artfully perforated back, Very imparts sophistication wherever it goes—from the conference room to the café—from Chicago to Shanghai.

HAWORTH®

Very Seating Family

The Very family includes a Conference Chair, Side Chair, Seminar Chair, Wire Stacker, and Cart.

Confencing comes to life with Planes® Collection and Very conference seating with upholstered seat and back.

Very wire stackers offer personality, form and function.

Very Adaptable

With an internationally influenced color palette and four seating styles to select from, there's a choice for everyone. Whether you prefer neutral colors for your guest seating, upholstered seat and back for the conference room—or a splash of color in the café, Very brings choices to life.

Its minimal design focuses on user needs and allows Very to adapt and support many environments. From educational spaces to conference rooms, teaming to hoteling, guest seating to cafés, Very can work across your organization.

Very Smart

Very seating has built-in intelligence for user comfort. The Very seminar and conference chairs provide intuitive recline, ensuring user weight is absorbed and distributed to provide natural support. And all Very chairs featuring the perforated back offer users comfort through flexibility, torsional movement and a back that breathes.

Very Convenient & Very Sustainable

The slender profile fits in anywhere, and when they're not in use, convenient stacking capabilities come through! The wire stacker can stack 10 high on the floor—up to 40 on the cart for easy mobility. And the side and seminar chairs both stack 5 high on the floor or cart.

In addition to convenient storing and stacking, Very seating goes easy on the environment and your budget. Very is MBDC Gold Certified. The family includes up to 53% recycled content and is up to 98% recyclable. Very seating can be disassembled for recycling in less than five minutes. In addition, Very is Greenguard® certified. The Very seating family is sure to support your sustainability strategies and can contribute towards LEED® credits.
